

CONTRACTOR ◇ CONNECTION

Taking My Hacks

A message from Jackson Lumber & Millwork President, Mark Torrisi

Last year felt like we were finally getting back to a sense of normalcy, at least as far as the lumber market is concerned.

We saw prices stay fairly stable, with much smaller fluctuations than we experienced in the previous two years. With 2023 now sitting in the rearview mirror, I want to share my thoughts on where I think 2024 will take us.

As for the lumber market, the price forecast for the beginning of 2024 looks very similar to the pricing we saw throughout 2023, fluctuating within a relatively narrow range.

However, we are closely watching the forecasts for continued heavy curtailment out in Western Canada. That will be offset by additional production coming out of the U.S. South.

What does that mean for us? Western SPF will become harder to source, and prices will probably rise. That is usually where we get most of our 2x10 and 2x12

"As for the lumber market, the price forecast for the beginning of 2024 looks very similar to the pricing we saw throughout 2023."

framing material. We have secured contracts for consistent supply from various mills throughout the year, so we should be in a good position.

Long term, we might have to start looking for alternatives to western SPF, which could include I-joists or using southern yellow pine for floor joist or rafters.

I am not expecting this to happen in the next few years, but it could happen sometime in the future. We will keep an eye on this and keep you informed as things change.

As for the economy, I expect things to improve as the year progresses. Projections for the second half of the year call for some relief from the soaring interest rates that stifled the U.S. housing market and overall economy for much of 2023.

Single family housing starts are forecasted to rise by 4% this year. On the downside, multi-family housing starts are expected to fall anywhere from 25% to 40%. Lower interest rates should also have a positive impact on renovation and remodeling projects.

Our goal here at Jackson Lumber & Millwork is to provide you with the best possible service and value, so please do not hesitate to contact any of our team members to help you with your projects. Thank you again for giving us the opportunity to serve you. Your business is greatly appreciated.

Product Showcase

Jackson Lumber & Millwork is Now Stocking Exterior Door Frame Components for 7-5/8" Wall.

Exterior Wall Depth Change

In order to adapt to new stretch code requirements in Massachusetts and New Hampshire, many wall systems are migrating to wall panels with built-in insulation that integrates moisture, air, and thermal protection. As a result, the exterior wall depth changes to 7-5/8" when utilizing Huber R6 Zip Insulated R-Sheathing.

Home Energy Rating System

By integrating performance testing, building materials, HVAC equipment, appliances, and lighting, the Home Energy Rating System (HERS) provides a holistic view of the energy usage of the home.

When it comes to building materials, how does a HERS rating work? It looks at an array of building materials used in the home and calculates the impact each component will have on the HERS score.

Insulation type, depth, and quality of installation are all documented to calculate the

R-Value of the walls, floors, and ceilings of the home.

Window performance ratings show the insulation factor, U-Value, and how much solar energy radiates through the glass – the solar heat gain coefficient (SHGC).

Additional factors, including the framing factor of walls or radiant barriers on roofs, are also documented and entered into the HERS rating software.

For more information about our new component options for 7-5/8" wall depth please contact your Jackson sales representative.

JLM Employee Spotlight

Janet Maglia

Kitchen Designer
North Andover

A versatile, skilled, and talented designer, Janet Maglia has been an integral part of the Jackson Kitchen Designs team for 26 years.

The U-Mass Lowell Business Administration major started with Jackson as a receptionist in 1998 but soon became interested in learning the design aspect of the business. She took many courses with the National Kitchen and Bath Association (NKBA) and attended classes

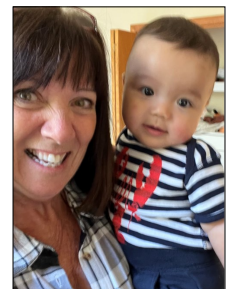

with various manufacturers to learn about their products. Armed with this training, Janet became a kitchen designer less than two years after joining the company.

A real people person, Janet loves working with clients to transform their existing kitchen, bath, or office into a more functional and beautiful space. She likes helping clients make cabinetry, countertop, and hardware selections that reflect their own unique style and taste.

What does the future hold? Janet plans to continue working as a designer but in the

future, she might want to semi-retire and travel more frequently. Besides traveling, Janet enjoys cooking, reading, walks on the beach, spending time with family and friends, and playing 45's.

Janet loves spending time with her fiancé Steve, her son Thomas and wife Cece, and son Michael and wife Elyse, but her pride and joy is her 10-month-old grandson Leo, who she just can't get enough of!

Janet Maglia & grandson Leo.

JLM Vendor Spotlight

Woodgrain

Headquarters:
Woodgrain Distribution—Lawrenceville, GA
Woodgrain Millwork—Fruitland, ID

Quality Craftsmanship Meets Superior Performance.

One of the largest millwork operations in the world, Woodgrain is a vertically integrated wood manufacturer and distributor specializing in lumber, mouldings, doors, and windows.

Proud to be family owned and operated for over 65 years, Woodgrain was founded by Bud Dame in 1954, and continues to grow under the third generation of Dame family leadership. Their core values drive Woodgrain's success - safety, integrity, servant leadership, respect, and customer focus. These values are the crux of Woodgrain's overall mission to leverage vertical integration to deliver specialized solutions and building products at premier service levels. The way employees are treated instills pride in themselves, their company, and the customers served.

Vertical Integration

Woodgrain owns their supply chain, which is rare in this industry. They own the forest that they cut and process their lumber from, as well as the facilities that manufacture their mouldings and the parts that are used for their doors and windows. They own each step in the supply chain, which ensures complete oversight of the quality of wood they process and the finished parts they produce. Because Woodgrain owns their own trucks and distribution, they are not dependent on industry shifts or controlled by outside environments, which means they can ensure quality control and efficient delivery times, every time.

Woodgrain & Huttig

In 2022, Woodgrain acquired Huttig Building Products, one of the largest distributors of millwork, building materials, and wood products. This move significantly increased Woodgrain's product offerings with a range of value-added services and a more robust vertical integration strategy. Woodgrain now offers a coast-to-coast distribution network and a wide variety of products that cater to diverse needs and preferences while always maintaining the quality of their products.

Woodgrain & Jackson

The Woodgrain go-to-market strategy is to increase exposure for all vendor partners through continuing education, display and sample placement, field product support, and customer engagement events. Jackson Lumber & Millwork counts on Woodgrain as a distribution partner for these premium products and brands: AZEK TimberTech Deck, Rail, and Trim, HB&G Columns, Maibec Cedar Shingles, PlyGem Vinyl Siding, GRACE and env-s by GCP, Simpson Strong-tie, Thermo-Tru Exterior Doors, and Masonite Interior Doors.

Trending Products

The market trends that Woodgrain sees for 2024 are minimalistic design, outdoor living as a growth category, mixed-mediums on siding, and pre-finished products for low-maintenance and sustainability.

As a market leader in the outdoor living category, Woodgrain is the only distributor committed to the full AZEK EXTERIOR ENVELOP – Shingle Panels, Bevel Siding, Board & Batten, Deck, Railing, and White and Pre-Finished Trim.

Therma-Tru exterior doors are the 'doorway' to a beautiful outdoor environment. The new Veris line is a premium collection of expansive aluminum glass doors offering a seamless transition to any outdoor living space. Our local Woodgrain branch is a pre-finish facility for PrismaGuard painted Thermo-Tru doors.

The premier name in pre-finished Eastern White Cedar Shingles, Maibec now offers custom pre-finished Western Red Cedar Shingles. If you are looking for the best of the best, look no further!

Woodgrain is a full-source provider of exterior siding. Create a dynamic siding presentation with Silvermine Stone, the original mortarless stone veneer with built-in flashing, and PlyGem vinyl lap siding and board and batten accents.
